HANDAYANI, TU., 2018, EVALUASI PENGGUNAAN OBAT ANTIPSIKOTIK PADA PASIEN SKIZOFRENIA DI RAWAT INAP RSJD SURAKARTA PERIODE 2017, SKRIPSI, FAKULTAS FARMASI, UNIVERSITAS SETIA BUDI, SURAKARTA.

Skizofrenia adalah suatu penyakit otak persisten dan serius yang melibatkan perilaku psikotik, pemikiran konkret, kesulitan dalam memperoleh informasi serta kesulitan dalam memecahkan masalah. Tingginya persentase penderita skizofrenia di RSJD Surakarta, maka perlu pemantauan penggunaan obat untuk menghindari efek samping yang merugikan. Tujuan penelitian ini adalah untuk mengetahui gambaran penggunaan antipsikotik dan evaluasi penggunaan antipsikotik pada pasien skizofrenia di Rawat Inap RSJD Surakarta tahun 2017.

Penelitian ini merupakan penelitian non eksperimental. Pengumpulan data secara retrospektif dan dianalisis secara deskriptif. Teknik sampling yang digunakan adalah *purposive sampling*. Diperoleh sampel sebanyak 120 pasien. Penelitian dilakukan dengan mengevaluasi penggunaan antipsikotik berdasarkan tepat indikasi, tepat obat, tepat pasien, tepat dosis, tepat cara pemberian dan tepat frekuensi pemberian. Data yang didapat disesuaikan dengan Formularium RSJD Surakarta dan Konsensus Penatalaksanaan Skizofrenia

Hasil penelitian menunjukkan bahwa dari 120 pasien, penggunaan antipsikotik pasien skizofrenia di Rawat Inap RSJD Surakarta tahun 2017 berdasarkan Formularium RSJD Surakarta dan Konsensus Penatalaksanaan Skizofrenia didapatkan tepat indikasi sebanyak (100%), tepat obat (94,2%), tepat pasien (100%), tepat dosis (96,6%), tepat frekuensi pemberian (96,6%), dan tepat cara pemberian (100%).

Kata kunci :Skizofrenia, Evaluasi penggunaan antipsikotik, penelitian non eksperimental

ABSTRACT

HANDAYANI, TU., 2018, EVALUATION ULITIZATION OF ANTIPSYCOTIC DRUGS IN SCHIZOPHRENIC IN PATIENT CARE AT THE RSJD SURAKARTA BY 2017, RESEARCH, THE FACULTY OF PHARMACY, SETIA BUDI UNIVERSITY, SURAKARTA.

Schizophrenia is a persistent and serious brain disease that involves psychotic behavior, concrete thinking, difficulty in obtaining information and difficulties in problem solving. The high percentage of schizophrenic in the RSJD Surakarta, it is necessary to monitor the utilization to avoid the adverse of side effects. The purpose of this study was to describe the use of antipsychotics and evaluate the use of antipsychotics in schizophrenic in patient care at the RSJD Surakarta by 2017.

This research is a non-experimental study. Data collection was retrospective and analyzed descriptively. The sampling technique used was purposive sampling. A sample of 120 patients was obtained. The study was conducted by evaluating the use of antipsychotics based on the exact indication, the exact drug, the exact patient, the exact dosage, the exact of giving method and the exact of giving frequency. The data obtained were compared with the Formulary of the RSJD Surakarta and the Consensus of Management of Schizophrenia.

The results showed that of the 120 patients, the antipsychotic use of schizophrenic in patient care at the RSJD Surakarta by 2017 was based on the RSJD Surakarta Formulary and the Consensus Management of Schizophrenia was obtained as much as (100%), exact indication (94.2%), the exact patient (100%), the exact dosage (96.6%), the exact of giving frequency (96.6%), and the exact of giving method (100%).

Keywords: Schizophrenia, Evaluation of the use of antipsychotics, non-experimental studies
