

INTISARI

Andi Harmawati Novriani. HS. 2015. Pengaruh Pengetahuan, Sikap Petugas Laboratorium dan Ketersediaan Fasilitas APD terhadap Penerapan Standar Prosedur Operasional (SPO) di Laboratorium Patologi Klinik RSUD Dr. Moewardi. Program Studi D-IV Analisis Kesehatan, Fakultas Ilmu Kesehatan, Universitas Setia Budi.

Standar Prosedur Operasional Laboratorium Patologi Klinik RSUD Dr. Moewardi adalah salah satu upaya peningkatan mutu pelayanan kesehatan adalah dengan memprioritaskan pengendalian infeksi mengingat tingginya penyebaran berbagai penyakit yang ditularkan melalui darah dan cairan tubuh lainnya.

Jenis penelitian yang digunakan adalah *deskriptif analitik* dengan metode *cross sectional study*. Pendekatan yang digunakan adalah pendekatan kuantitatif. Penelitian ini dilaksanakan di Laboratorium Patologi Klinik RSUD Dr. Moewardi. Populasi dalam penelitian ini adalah seluruh petugas laboratorium Patologi Klinik RSUD Dr. Moewardi. Analisis data dilakukan dengan analisa univariat dan bivariat untuk mengetahui variabel independen dan dependen dengan menggunakan Uji *Kendall's Tau* dan *Spearman rho* pada tingkat kepercayaan 95 % ($\alpha=0,05$).

Hasil dari penelitian ini menunjukkan Ada pengaruh pengetahuan dan ketersediaan fasilitas APD terhadap penerapan SPO di laboratorium Patologi Klinik RSUD Dr. Moewardi.

Kata kunci : Standar Prosedur Operasional (SPO), Pengetahuan, Sikap dan Ketersediaan fasilitas APD

ABSTRACT

Andi Harmawati Novriani. HS. 2015. The Effect of Knowledge, Attitude of laboratory workers and the Availability of APD Facilities toward Standard Operating Procedures (SOPs) in the Clinical Pathology Laboratory at RSUD Dr. Moewardi. D-IV Health Analyst Study Program, Health Sciences Faculty, Setia Budi University.

Standard Operating Procedures for Clinical Pathology Laboratory at RSUD Dr. Moewardi is one of the efforts to improve health care quality which is prioritized at infection control spread of various diseases transmitted through blood and other body fluids.

This type of research was a descriptive analytic with cross sectional study. The approach used was quantitative approach. This research was conducted at Clinical Pathology Laboratory RSUD Dr. Moewardi. The population in this study was all workers of Clinical Pathology Laboratory at RSUD Dr. Moewardi. The data was analyzed by using univariate and bivariate. The analysis to determine the independent and dependent variables was done by using Kendall's Tau test and Spearman rho at 95% confidence level ($\alpha = 0.05$).

Results obtained from this study indicated that there is a significance influence of knowledge and the availability of PPE toward the application of SOP in the Clinical Pathology Laboratory RSUD Dr. Moewardi.

Keywords: Standard Operating Procedures (SOPs), Knowledge, Attitude and the availability APD facilities
