KESIMPULAN DAN SARAN

A. Kesimpulan

Berdasarkan hasil penelitian yang telah dilakukan maka dapat disimpulkan sebagai berikut :

Pertama, ekstrak etanol daun jambu biji (*Psidium guajava L*) dapat dibuat sebagai sediaan masker gel *peel-off* dengan berbagai variasi konsentrasi gelatin dan HPMC dengan memiliki sifat fisik dan stabilitas yang baik.

Kedua, semua formula sediaan masker gel *peel-off* ekstrak etanol daun jambu biji (*Psidium guajava L*) memiliki aktivitas antibakteri terhadap *Staphylococcus epidermidis* ATCC 12228.

Ketiga, formula terbaik sediaan masker gel *peel-off* ekstrak etanol daun jambu biji (*Psidium guajava L*) yang memiliki sifat fisik, stabilitas, dan aktivitas antibakteri yang baik terhadap *Staphylococcus epidermidis* ATCC 12228 adalah formula I dengan konsentrasi gelatin 5% dan HPMC 2,5% dengan rata-rata diameter daya hambat paling tinggi sebesar 17,14 mm.

B. Saran

Dari penelitian yang telah dilakukan, disarankan pada peneliti selanjutnya agar didapatkan hasil yang lebih maksimal sebagai berikut :

1. Perlu dilakukan percobaan variasi basis menggunakan basis jenis lain yang memiliki kemampuan *film forming* untuk mendapatkan konsentrasi basis yang lebih menyenangkan yang membantu dalam penggunaan dan aktivitas antibakteri.
2. Perlu dilakukan isolasi senyawa utama daun jambu biji yang memiliki aktivitas antibakteri, antivirus dan antifungi untuk memaksimalkan dalam membunuh mikroba patogen.
3. Perlu dilakukan uji aktivitas antibakteri masker gel *peel-off* ekstrak etanol daun jambu biji (*Psidium guajava L*) menggunakan spesies bakteri penyebab jerawat yang berbeda.
