

BAB V

KESIMPULAN DAN SARAN

A. Kesimpulan

Berdasarkan hasil penelitian uji mutu fisik sediaan pasta gigi ekstrak daun sirih dengan variasi konsentrasi Na CMC sebagai pengikat dapat disimpulkan bahwa:

1. Semakin meningkatnya konsentrasi Na CMC pada sediaan pasta gigi ekstrak daun sirih (*Piper betle L.*) berpengaruh terhadap peningkatan viskositas sediaan pasta gigi.
2. Konsentrasi Na CMC 3% dalam formulasi pasta gigi ekstrak daun sirih mempunyai mutu fisik yang paling baik.

B. Saran

saran yang dapat diberikan untuk penelitian pasta gigi ekstrak daun sirih (*Piper betle L.*) dengan variasi konsentrasi Na CMC:

Pertama, perlu dilakukan penelitian lebih lanjut untuk mengembangkan hasil penelitian yang lebih akurat dan efek penggunaan pasta gigi ekstrak daun sirih (*Piper betle L.*)

Kedua, perlu dilakukan pengujian anti bakteri setelah dilakukan pembuatan pasta gigi.
