### **KESIMPULAN DAN SARAN**

#### **A. Kesimpulan**

Kesimpulan yang didapat dari penelitian yang sudah dilakukan adalah sebagai berikut:

1. Krim pada formula 1,2,3 dan 4 memenuhi uji mutu fisik dan uji stabilitas yang baik.
2. Sediaan krim ekstrak kulit buah rambutan memberikan efek *anti-aging* pada hewan uji yang telah dilakukan induksi sinar UV-A dengan meningkatkan parameter kolagen, elastisitas, kelembaban dan luas pori secara signifikan yang diukur menggunakan alat *Skin Analyzer* jika dilihat dari perubahan nilai parameter sebelum dan sesudah dioles krim.
3. Sediaan krim ekstrak etanol kulit buah rambutan dengan konsentrasi 3% memberikan efek paling efektif dibandingkan dengan krim dengan konsentrasi 6% dan 9%
4. Krim ekstrak kulit buah rambutan memiliki IIPR (indeks iritasi primer) sebesar 0,25 krim sangat sedikit mengiritasi dan IIO (indeks iritasi okular) sebesar 0,00 krim tidak mengiritasi sehingga krim ekstrak kulit buah rambutan aman digunakan sebagai produk kosmetik.

#### **B. Saran**

Berdasarkan penelitian yang telah dilakukan maka saran yang dapat disusun adalah sebagai berikut :

1. Perlu dilakukan pengembangan dalam bentuk sediaan topikal lain yang dapat digunakan sebagai *anti aging*.
2. Perlu dilakukan fraksinasi untuk pemisahan senyawa flavonoid agar memberikan efek *antiaging* yang efektif.
3. Perlu dilakukan pengukuran dengan menggunakan parameter yang lainnya.
